

## DELIVERY METHODS

**ILT – Instructor-Led Classroom Training**  
ILT sessions are conducted in a physical classroom environment.

**ILO – Instructor-Led Online Training**  
ILO sessions are conducted via WebEx in a VoIP environment

**FLEX Classroom™ – Combined ILT & ILO**  
FLEX Classroom sessions are delivered via ILT and ILO giving you the ultimate flexibility.

# Architecting with Google Compute Engine (AGCE)

ID GO-AGCE Price US\$ 1,995 Duration 3 days

## Who should attend

This course is intended for the following participants:

- Cloud Solutions Architects, DevOps Engineers
- Individuals using Google Cloud to create new solutions or to integrate existing systems, application environments, and infrastructure, with a focus on Compute Engine

## Prerequisites

To get the most out of this course, participants should:

- Have completed [Google Cloud Fundamentals: Core Infrastructure \(GCF-CI\)](#) or have equivalent experience
- Have basic proficiency with command-line tools and Linux operating system environments
- Have systems operations experience, including deploying and managing applications, either on-premises or in a public cloud environment

## Course Objectives

This course teaches participants the following skills:

- Configure VPC networks and virtual

machines

- Administer Identity and Access Management for resources
- Implement data storage services in Google Cloud
- Manage and examine billing of Google Cloud resources
- Monitor resources using Google Cloud services
- Connect your infrastructure to Google Cloud
- Configure load balancers and autoscaling for VM instances
- Automate the deployment of Google Cloud infrastructure services
- Leverage managed services in Google Cloud

## Course Content

This three-day instructor-led class introduces participants to the comprehensive and flexible infrastructure and platform services provided by Google Cloud, with a focus on Compute Engine. Through a combination of presentations, demos, and hands-on labs, participants explore and deploy solution elements, including infrastructure components such as networks, systems, and application services. This course also covers deploying practical solutions including securely interconnecting networks, customer-supplied encryption keys, security and access management, quotas and billing, and resource monitoring.

## Detailed Course Outline

## DELIVERY METHODS

### ILT – Instructor-Led

#### Classroom Training

ILT sessions are conducted in a physical classroom environment.

### ILO – Instructor-Led

#### Online Training

ILO sessions are conducted via WebEx in a VoIP environment

### FLEX Classroom™ –

#### Combined ILT & ILO

FLEX Classroom sessions are delivered via ILT and ILO giving you the ultimate flexibility.

## Module 1

### Introduction to Google Cloud

#### Topics covered:

- List the different ways of interacting with Google Cloud
- Use the Cloud Console and Cloud Shell
- Create Cloud Storage buckets
- Use the Google Cloud Marketplace to deploy solutions

## Module 2

### Virtual Networks

#### Topics covered:

- List the VPC objects in Google Cloud
- Differentiate between the different types of VPC networks
- Implement VPC networks and firewall rules
- Implement Private Google Access and Cloud NAT

## Module 3

### Virtual Machines

#### Topics covered:

- Recall the CPU and memory options for virtual machines
- Describe the disk options for virtual machines
- Explain VM pricing and discounts
- Use Compute Engine to create and customize VM instances

## Module 4

### Cloud IAM

#### Topics covered:

- Describe the Cloud IAM resource hierarchy
- Explain the different types of IAM roles
- Recall the different types of IAM members
- Implement access control for resources using Cloud IAM

## Module 5

### Storage and Database Services

#### Topics covered:

- Differentiate between Cloud Storage, Cloud SQL, Cloud Spanner, Cloud Firestore and Cloud Bigtable
- Choose a data storage service based on your requirements
- Implement data storage services

## Module 6

### Resource Management

#### Topics covered:

- Describe the cloud resource manager hierarchy
- Recognize how quotas protect Google Cloud customers
- Use labels to organize resources
- Explain the behavior of budget alerts in Google Cloud
- Examine billing data with BigQuery

## Module 7

### Resource Monitoring

#### Topics covered:

- Describe the services for monitoring, logging, error reporting, tracing, and debugging
- Create charts, alerts, and uptime checks for resources with Cloud Monitoring
- Use Cloud Debugger to identify and fix errors

## Module 8

### Interconnecting Networks

#### Topics covered:

- Recall the Google Cloud interconnect and peering services available to connect your infrastructure to Google Cloud

## DELIVERY METHODS

### ILT – Instructor-Led Classroom Training

ILT sessions are conducted in a physical classroom environment.

### ILO – Instructor-Led Online Training

ILO sessions are conducted via WebEx in a VoIP environment

### FLEX Classroom™ – Combined ILT & ILO

FLEX Classroom sessions are delivered via ILT and ILO giving you the ultimate flexibility.

- Determine which Google Cloud interconnect or peering service to use in specific circumstances
- Create and configure VPN gateways
- Recall when to use Shared VPC and when to use VPC Network Peering

## Module 9

### Load Balancing and Autoscaling

#### Topics covered:

- Recall the various load balancing services
- Determine which Google Cloud load balancer to use in specific circumstances
- Describe autoscaling behavior
- Configure load balancers and autoscaling

## Module 10

### Infrastructure Automation

#### Topics covered:

- Automate the deployment of Google Cloud services using Deployment Manager or Terraform
- Outline the Google Cloud Marketplace

## Module 11

### Managed Services

#### Topics covered:

- Describe the managed services for data processing in Google Cloud
